Discover the AXIUM Platform

A reliable, versatile acceptance solution built to last and to inspire endless possibilities

Running entirely on Android, the AXIUM platform supplies you with an innovative POS range, an extensive payment applications portfolio and a future-proof and secure operating system. Alongside an Appstore to deploy business applications, it also leverages our turnkey services, including estate management, security and customer care.

"Ingenico's AXIUM platform is a key differentiator"

"It providing us a platform where we can build our payment application on. Furthermore, as there is a fair amount of investment needed in logistics to scale the business, Ingenico's Managed Services has benefited both our customers and us."

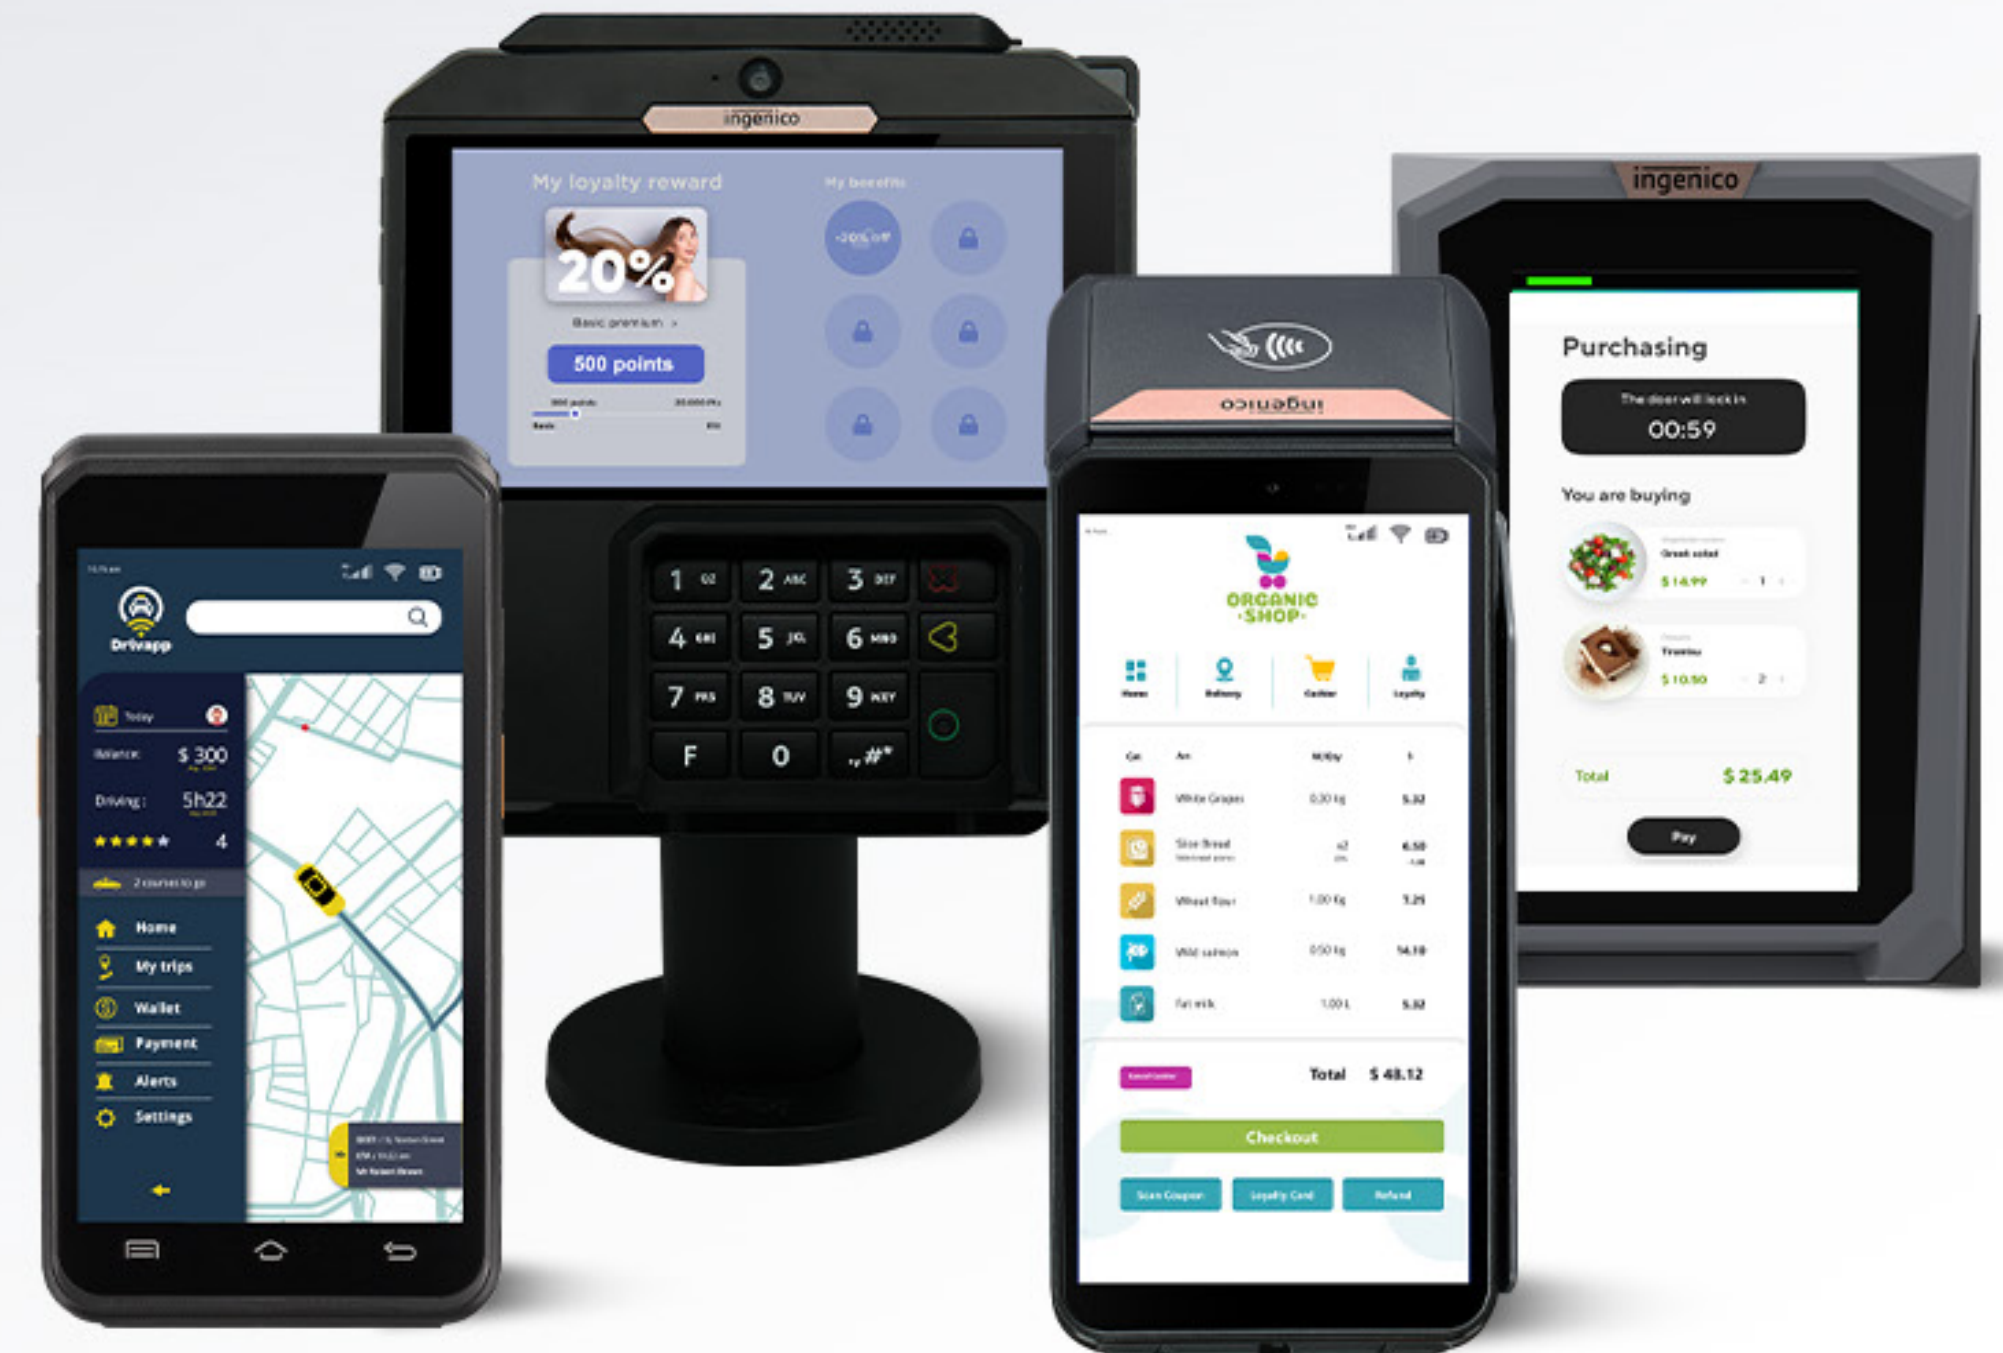

Tyro, Leading Australian payments company

Stylish, high-end build quality and durability at the heart of the design.

The AXIUM devices are the perfect investment for any business looking to stay ahead in the market.

Our AXIUM range has been designed to cover all market segments, from countertop to portable, from mobile to retail PIN Pad and self-service. With different form factors, screen sizes and accessories, we serve all types of business and all payment scenarios. Whatever their requirements, clients can find the ideal POS solution.

The dark colour and paint-free cases of the devices simplify cleaning and prevent fading. The AXIUM series flagship models boast larger screens, high performance and scratch resistance, with enhanced resilience against external factors.

AXIUM has been designed with longevity in mind, ensuring customers receive the best return on their investment.

Our portfolio extends the life of your payment solutions, thanks to the combination of the AXIUM Operating System with high-end hardware features.

The large memory and display configurations support future advances, while the long-lasting battery life ensures reliable, continuous operation. On the software front, Ingenico's AXIUM solution offers a consistent and long-term strategy. The AXIUM platform is designed to be application-driven thanks to devices with large screens (up to 6 inch), powerful memory configuration

(up to 4+32G), an always evolving AXIUM OS, the App Store, and much more. The AXIUM platform offers an unbeatable combination of durability, high-quality hardware and forward-thinking software. AXIUM is the solution of choice for businesses looking to invest in a cutting-edge, reliable and long-lasting payment acceptance solution.

“We have found in our most recent deployments of Ingenico’s new AXIUM platform that the solution is incredibly fast!”

“We have many enterprise-level clients focusing on high-volume environments, where it is all about speed and the customer experience. We’ve found that our clients who are using AXIUM are reporting more significant performance increases than any of the other technologies we have used in the past. Further, we are regularly seeing a reduction in transaction times from ~7 seconds down to as low as 1.2 seconds. In fact, in a time and motion study conducted by one customer, they have estimated an overall business saving of approximately 5,000 hours of checkout time a year as a direct result of the switch to AXIUM. They are citing significant reductions in queues at checkout and POS. Customer satisfaction is up and they are loving the larger “pin-sharp” screen which they also use for at-checkout advertising, loyalty and rewards.”

Business enablement

Provide access to a large ecosystem of business apps and enable their deployment through an App store.

Customer Care

Outsource your estate management to one single partner and control the cost of solution delivery with managed services.

“Help small business owners compete more effectively with larger businesses”

“The large screen on the AXIUM DX8000 also creates an opportunity for merchants to engage customers at the point of sale with graphical images and messaging or even with ads to create a new revenue stream. These types of features can enhance experiences for consumers and also help small business owners compete more effectively with larger businesses that have invested in developing these capabilities at the point of sale.”

Moneris, Payment processor in Canada

Performance and digital experience for everyone

Choose your smart terminal

With its unparalleled wide Android offer, Ingenico is covering all market segments. Whether you are a small merchant, a self-service operator or a large retailer.

Based on Android 10 minimum, AXIUM POS are designed to improve payment performance, while managing the latest powerful business apps. Combining value-added payment and commerce services with an enhanced ergonomics interface, they optimize the digital experience for both merchants and consumers. AXIUM POS provide advanced functionalities like large full touchscreens, a high-capacity battery, rear and front cameras*, scanners* for retail usage or skimmer* for fraud detection (*optional features). AXIUM Smart POS are designed to provide smooth checkouts and hassle-free payments for the visually impaired.

Smart POS – Countertop & portable solutions for small & medium businesses

A best-in-class digital experience in-store

Engage consumers with services such as loyalty, couponing or Click & Collect that are usually limited to large retail outlets. Address any check-out scenario in-store, combining payment and commerce services.

Rely on Ingenico's worldwide expertise in payment applications

Benefit from our unmatched expertise, gained from developing thousands of payment applications over four decades, to speed-up your AXIUM fleet time-to-market. We can provide payment applications tailored to customers' specific needs, relying on local and global Android payment application development experts, backed-up by our Android Competency Centre.

Android Competency Centre

- Supports all payment application development projects in all regions with Android dedicated skills
- Develops and maintains a generic Android payment framework to accelerate payment application time-to-market

“With AXIUM, we aim to empower our partners and merchants with a reliable, secure, and forward-leaning terminal line that integrates with our omnichannel offerings, providing them with the tools they need to succeed.”

“Payroc wanted to bring a top-of-the-line terminal that could go toe to toe with anybody else and we really think that’s what we have with Ingenico AXIUM and the Payroc App.”

Payroc, Payment processor in Canada

Create value-added services for merchants and retailers

With AXIUM business enablement, the wide community of developers on Android can easily implement any business application.

Our dedicated set of APIs allows single integration with the payment world for all devices. Payment providers can create their own application stores, and their own catalogues of apps and distribute them in a few clicks. This allows small merchants and retailers to access a broad set of business applications on demand from their terminal to better serve their customers. Through powerful vertical applications and back-office services, they can better drive their business by connecting the payment device directly to their accounting or inventory systems, and monitoring their business through analytics and reports. Merchants can also improve customer loyalty by providing advanced services such as digital receipt management, couponing, or financing.

Deploy new commerce services on AXIUM devices instantly with the Appstore.

Maximise device availability and business security

Our cloud-based estate management solution allows you to organise, manage and monitor your fleet with one single platform.

With the mobile device management capabilities, you can not only track every device anywhere in the world, but also use geofencing to ensure your terminals are where they should be at all times. With remote helpdesk, your maintenance service is optimised as on-field intervention is restricted to specific operations. The remote keys injection solution, eSign solution (digital signature of applications), and P2PE solution, ensure that your AXIUM estate always complies with the latest regulations and standards.

Manage your fleet across the entire lifecycle with advanced monitoring and security capabilities.

Peace of mind guaranteed

Ingenico customer care services can either be accessed as needed or form part of managed services offer.

You choose how we support your business – from à la carte support to a fully outsourced service that includes consulting and design, repair and maintenance and end-of-life management.

Experience unparalleled peace of mind with Ingenico's managed services and AXIUM.

Our customer care services are always at your fingertips, ready to assist whenever you need it. Choose from accessing them on-demand or as part of a comprehensive package that includes everything you need for seamless payments acceptance.
